1. What is Scorr?

Scorr (<https://scorr.walfia.ai>) is a company workspace for performance KPIs, GPS attendance, and company gifts. One login works on the website, Android app, and iPhone Home Screen app.

Each registered company is a private tenant. Staff in Company A cannot open Company B's people, KPIs, attendance, or GPS records.

What you run in one place

- KPI tasks with weightage (0–100% per person). Overall, Month, and Year views.
- Departments, people, roles, and reporting lines.
- GPS attendance (geofence), day and overnight shifts, leave, and live team location.
- Company rewards based on monthly weightage — not a separate points wallet.
- Daily work reports, analytics, and exports.
- Authenticator MFA, backup codes, and email OTP recovery.

The person who registers the company becomes the first Administrator after the organization is approved.

2. Register your organization

Use Register Company on the public site. After approval you receive trial access with full product features.

2.1 Fill the form

Step 1: Open <https://scorr.walfia.ai> and choose Register Company.

Step 2: Enter company name, industry, and approximate headcount.

Step 3: Enter your name, work email, phone, and password (at least 6 characters).

Step 4: Choose a plan.

Step 5: Enter the one-time email code (OTP). Registration does not finish without it.

Step 6: Submit and wait for platform approval.

2.2 After approval

- Sign in with the same email and password.
- Scorr opens the Admin dashboard.
- Do not create the rest of the team until you can sign in as Admin.

2.3 First sign-in

Step 1: <https://scorr.walfia.ai>! Sign In.

Step 2: Accept the monitoring / data-use policy (required).

Step 3: Set up an authenticator app (Google Authenticator, Microsoft Authenticator, or Authy).

Step 4: Save backup codes offline — each code works once.

Step 5: Later logins: password + authenticator code (or one unused backup code).

Lost authenticator and no backup codes? On the MFA screen use email OTP recovery, then re-enroll MFA.
Admins can also reset authenticators from People.

3. Roles

Each person has one role. The role chooses the dashboard and what Scorr allows.

Role	Main purpose
Admin	Whole company: people, departments, assign KPIs, rewards, attendance, GPS, live map, analytics, export, branding.
Manager	Team: assign tasks, team ranking, own KPIs, team attendance/leave, live tracking, approve/reject team gifts.
Employee	Own work: My KPIs, attendance/leave, redeem gifts, Account Security, daily report.
HR	Shifts and rewards support without full Admin powers.

- Employees see only their own records.
- Managers see their team, not every department.
- Admins see only their organization.

4. Administrator menu

Sidebar order on the Admin dashboard (as shown in Scorr):

People

Directory: add users, roles, department, reporting manager, reset password / authenticator, open a person's tasks and scoreboard.

Assign Task

Pick department !' person !' KPI, set weightage and dates, Assign. Completing a and the assigner.

Daily Reports

Read staff daily work logs by department and role.

Rewards

Company gifts catalog, redemption queue (approve / reject / fulfill), and gift history. Reject returns weightage.

KPI & Rewards

People board with Earned / Current / Used / Banked weightage for the month. Open a person for the full scoreboard and tasks.

Analytics

Company KPI health, trends, and per-person weightage.

Attendance

Leave approvals and attendance history. Opening Attendance reconciles ended shifts.

Office GPS

Office/site pin, radius, assign sites to staff.

Live Tracking

Who is at site, away, or offline while checked in.

Departments

Org structure only (Sales, Finance, ...) — not a separate score engine.

Export

Monthly or quarterly Excel, PDF, or CSV.

Settings

Company name, logo, tagline, and colors.

5. Add people

Only an Administrator can create accounts. Sign in to your production company Admin dashboard (not the public demo).

5.1 Before you add people

- Create Departments first.
- Create Managers before Employees if you need reporting lines.
- Use each person's work email — that becomes their login.

5.2 Fields

Field	What to enter
Full name	Display name.
Email	Work email used to sign in.
Password	Temporary password (min 6 characters). Share it securely.
System role	Employee, Manager, Admin, or HR.
Department	Required for Manager and Employee.
Assign manager	Optional for Employee — pick a manager in the same department.

5.3 After create

- They appear in People immediately.
- They enroll MFA, save backup codes, then open their dashboard.
- Use Reset password or Reset authenticator when someone is locked out.

Demo admin cannot add real company users. Sign out and use your company Admin account.

6. First-time admin checklist

Step 1: Sign in as Admin.

Step 2: Departments — create departments. Add KPI metrics on each board if needed (library totals may exceed 100%).

Step 3: People — add Managers, then Employees.

Step 4: Office GPS — add sites if you use GPS attendance.

Step 5: Settings — company name, logo, colors.

Step 6: Assign Task — department !' person !' KPI, weightage, dates.

Step 7: Rewards — review the catalog and gift rules.

Step 8: Ask every staff member to enroll MFA and allow location if you use GPS.

7. Manager menu

Managers work with their team and their own KPIs. There is no Branding tab.

Assign Task

Assign KPIs in the manager's department. Completions notify the assigner and reporting manager.

Team / People

Team ranking. Open a person for a read-only scoreboard.

My KPIs

Manager's own tasks and weightage scoreboard.

Attendance

Team leave, check-in, shifts, and live tracking.

Rewards

Approve, reject, or mark delivered for team gift requests. Reject returns weightage. Personal redeem uses Current or Banked.

Settings

Password, Account Security, daily work report.

Managers cannot

- Create company users, departments, or branding.
- See unrelated departments or other companies.

8. Employee menu

My KPIs

Weightage scoreboard: Total, Assigned, Earned, Current, Used, Banked (for the current month), Unassigned. Switch Overall / Month / Year. Mark Complete to notify manager and assigner.

Attendance

GPS check-in/out, shift, leave requests, personal history. Shift end auto clock-out closes open visits.

Rewards

Company gifts and catalog. Redeem with Current when this month qualifies, or Redeem with Banked when Banked covers the gift cost. Track request status (pending / approved / delivered / rejected).

Settings

Password, Account Security, daily report.

9. HR role

HR supports shifts and rewards operations without full Admin powers (no People directory, no branding).

10. Departments & KPI weightage

Departments group people and managers. They are not a second scoring engine.

- Each employee/manager belongs to a department so Assign Task can list them.
- Pending/active KPI weight for one person cannot exceed 100%. Other people have their own 100% budgets.
- Department KPI libraries may list many metrics; assignment still respects the per-person 100% cap.
- Removing a department does not delete historical scores already saved on people.

10.1 Weightage on the scoreboard

- Earned — completed KPI weightage this month (0–100%).
- Current — remaining available this month after gift use / banking.
- Used — weightage spent on monthly gifts this month (cannot exceed Earned).
- Banked — leftover weightage saved across months after monthly gift redemptions.
- Overall / Month / Year filters are independent.

10.2 Assign & complete

Step 1: Admin or Manager opens Assign Task.

Step 2: Department !' person !' category / KPI !' weightage !' dates !' Assign.

Step 3: Person marks Complete. Email + in-app alerts go to reporting manager and assigner.

- Performance labels: 95–100 Outstanding · 90–94 Excellent · 80–89 Good · 70–79 Needs Improvement · below 70 Unsatisfactory.

11. Rewards (weightage, Banked, gifts)

Scorr rewards use monthly weightage (0–100%), not a separate points balance that never expires. Gifts are arranged by managers or admins after someone redeems.

11.1 Balance terms

Term	Meaning
Earned	This month's completed KPI weightage.
Current	What is still available this month.
Used	Gift cost charged this month (never shown above Earned).
Banked	Leftovers after monthly gifts, summed across months.

11.2 Monthly gifts (dinner or catalog)

- One monthly gift per person per month — either dinner voucher or one catalog item.
- Cost is the gift requirement only (for example dinner minimum %, or catalog weightage required) — not all of Current.
- This month's Current must meet the gift requirement to redeem with Current.
- After paying, leftover Current moves into Banked.
- Reject (manager/admin) returns the spent weightage and undoes that redeem's bank moves.

11.3 Redeem with Banked

- When Banked is high enough to cover a dinner or catalog cost, use Redeem with Banked.
- Banked pays the gift fully; this month's Current is not required to be in-band for that path.
- Still one monthly gift per month.
- Streak gifts (movie / surprise) do not spend Current or Banked.

11.4 Streak gifts

- Movie tickets — keep earned weightage in the 90–95% band for 3 months in a row.
- Surprise gift — keep 90–95% for 6 months in a row.
- A streak gift can be redeemed in the same month as one monthly gift.

11.5 Approval flow

Step 1: Employee or manager redeems (Current or Banked).

Step 2: Manager or Admin approves, rejects, or marks delivered.

Step 3: Rejected requests refund weightage; the person can redeem again that month if rules allow.

Catalog items show the weightage they require. Dinner uses your company's configured minimum (typically 95%).

12. Attendance, leave, shifts & GPS

12.1 Office GPS (Admin)

Step 1: Open Office GPS.

Step 2: Save a site: name, map pin, radius (about 50 metres).

Step 3: Assign the site to people.

- Times use Asia/Karachi.

12.2 Check-in

- Staff allow location. Inside the radius during the shift, Scorr can clock them in.
- Leaving the radius can clock them out.
- Android can keep sending pings while a session is open for the live map.
- Remote/hybrid modes can allow check-in without the office pin when enabled for that person.
- Multiple visits in one day are supported.

12.3 Overnight shifts & auto clock-out

- Shifts may cross midnight.
- When the shift ends, Scorr auto clock-out closes open visits.
- Opening Attendance or Live Tracking also reconciles ended shifts.

12.4 Leave & shifts

- Employee requests leave; Manager or Admin approves or rejects.
- Managers/HR/Admin set shift start/end and working days.

13. Device permissions

Scorr only asks for permissions the feature needs.

Permission	Why
Internet	Sign-in, KPIs, attendance, server mail.
Location (precise)	Clock in/out at the geofence; live tracking while checked in.
Location (background)	Android: attendance pings if the app is in the background during a shift.
Foreground service	Android notification while attendance tracking is active.
Notifications	Optional shift/attendance reminders.
Camera	Not used by Scorr. Authenticator apps may use camera to scan the MFA QR.

- Scorr does not need contacts, photos, microphone, SMS, or call logs.

Location is stored as attendance for your company admins and managers — not sold, and not shown to other companies.

14. Mobile apps

14.1 Android

Step 1: Open <https://scorr.walfia.ai> on the phone.

Step 2: Open the Mobile App / Download section.

Step 3: Download scorr.apk and allow install from this source if asked.

Step 4: Sign in with your Scorr email and password.

14.2 iPhone / iPad

Install as a Home Screen app (Safari):

Step 1: Open <https://scorr.walfia.ai> in Safari.

Step 2: Share !' Add to Home Screen.

Step 3: Open the Scorr icon and sign in.

- Enable Location when prompted for GPS attendance.

15. Security (MFA & recovery)

The browser and Android app use a public key plus your personal login. Privileged actions run as checked server functions.

15.1 Accounts

- Passwords are hashed by Supabase Auth — never stored readable.
- Failed logins are rate-limited.
- Idle sessions sign out after inactivity.
- Company signup requires email OTP.
- Admins, managers, HR, and employees enroll TOTP authenticator MFA.
- Save one-time backup codes. Each works once.
- Lost authenticator: email OTP on the MFA screen, then re-enroll — or ask authenticator.
- Settings !' Account Security: regenerate backup codes and review recovery

15.2 Isolation

- Every record is tied to a company. Role checks decide who can read or write.
- Employees cannot create users or change branding.
- Managers cannot assign KPIs outside their allowed team.
- GPS pings are written as the signed-in user only.

16. Troubleshooting

Problem	What to try
Cannot sign in	Registered email + wrong password ! "Incorrect password." Unknown email + wrong password ! "Incorrect email and password." Wait until the company is approved after registration.
Wrong dashboard	Ask Admin to check role on People.
Cannot add users	Must be Admin. Demo admin cannot add real users.
Department required	Create the department first, then assign Manager/Employee.
Authenticator lost	MFA screen ! email OTP ! re-enroll, or Admin reset authenticator.
Used looks higher than Earned	Used is gift cost this month and is capped at Earned. Refresh; only one monthly gift should apply.
Cannot redeem gift	Need Current in range for Redeem, or enough Banked for Redeem with Banked. Only one monthly gift per month.
Still working after shift	Open Attendance or Live Tracking to reconcile. Auto clock-out should close visits at shift end.
GPS check-in fails	Enable location; confirm site assignment; be inside radius during the shift.
Cannot assign KPIs	Pick department first, then person. That person's pending weightage cannot exceed 100%.
