1. What is Scorr?

Scorr (<https://scorr.walfia.ai>) is your company workspace for performance KPIs, GPS attendance, leave, daily work reports, and weightage-based rewards. One account works on the website, Windows desktop, Linux desktop, Android app, and iPhone Home Screen app.

Each registered company is private. Staff in one organization cannot see another company's people, tasks, attendance, or reports.

What you can do

- Register your organization and invite Admin, HR, Managers, and Employees.
- Assign KPI tasks with weightage (0–100% per person) and review completions.
- Automatic attendance (phone GPS/Wi-Fi or laptop on/off) inside a fixed window: 1 hour before shift start through 1 hour after shift end, in the shift's time zone. Manual clock in/out uses the same rules. Remote/hybrid day status and leave are separate.
- Submit daily work reports (employees, managers, and HR report to admin).
- Redeem company gifts with monthly weightage (Current / Used / Banked).
- Track field teams live and export monthly/quarterly reports.

Timezone for shifts and month-end weightage: Asia/Karachi. Branding can be customized by Admin under Settings.

2. How to download the app (all platforms)

Open the website on your phone or computer: <https://scorr.walfia.ai>. Scroll to the Apps / download section, or jump to <https://scorr.walfia.ai/#download-app>. Use the button that matches your device.

2.1 Windows desktop

- On the homepage, click Download for Windows (or open the Windows card under #download-app).
- You get Scorr-Setup.exe — the permanent Windows installer (Start Menu + Desktop shortcuts).
- Official release file: <https://github.com/usmanHassanzai/HR/releases/download/desktop-v1.3.5/Scorr-Setup.exe>
- Version is shown on the download card (e.g. 1.3.5). Same Sign In for Admin, HR, Manager, and Employee.

2.2 Linux desktop

- Click Download for Linux to get Scorr.deb (Ubuntu / Debian style install).
- Official release file: <https://github.com/usmanHassanzai/HR/releases/download/desktop-v1.3.5/Scorr.deb>
- After install, Scorr appears in your applications menu.

2.3 Android

- Tap Download Android App — this downloads scorr.apk (latest version).
- You can also open: <https://scorr.walfia.ai/downloads/scorr.apk>
- App ID: ai.walfia.scorr · Version is shown on the download card.
- Direct APK download remains available until 1 November 2026 (until Google Play is live).

2.4 iPhone / iPad

- There is no separate APK for iPhone. Install from Safari as a Home Screen app.
- Open <https://scorr.walfia.ai/?app=1> in Safari (see Section 3 for install steps).
- When the App Store listing is live, the site will show Get it on the App Store.

2.5 This PDF guide & security overview

- User guide: <https://scorr.walfia.ai/downloads/Scorr-Client-Feature-Guide.pdf>
- Security overview for organizations: <https://scorr.walfia.ai/downloads/Scorr-Security-Overview.pdf>
- Or regenerate locally: `npm run docs:client-guide` · `npm run docs:security-guide`

Inside the already-installed Android, iOS, Windows, or Linux app, store/download buttons are hidden — you already have Scorr installed.

3. How to install (Windows, Linux, Android & iPhone)

3.1 Install on Windows (permanent)

Use Scorr-Setup.exe — do not rely on unzipping a portable folder. The Setup wizard installs Scorr so you can open it from the Start Menu and Desktop.

Step 1: Open <https://scorr.walfia.ai/#download-windows> and click Download for Windows.

Step 2: Open the downloaded file Scorr-Setup.exe.

Step 3: If Windows SmartScreen says “Windows protected your PC”, click More info (the file came from scorr.walfia.ai / the official GitHub Release).

Step 4: Follow Next! choose install folder if asked! Install.

Step 5: Finish the wizard; open Scorr from the Start Menu or Desktop shortcut.

Step 6: Sign in with your company email and password! allow Location (Always / while using the app) for attendance.

- To uninstall later: Windows Settings! Apps! Scorr! Uninstall (or use the uninstaller).
- Updating: download the latest Scorr-Setup.exe and run it again over the existing install.

3.2 Install on Linux (.deb)

Step 1: Open <https://scorr.walfia.ai/#download-linux> and click Download for Linux (Scorr.deb).

Step 2: Open a terminal in your Downloads folder: `cd ~/Downloads`

Step 3: Install: `sudo apt install ./Scorr.deb`

Step 4: Open Scorr from your applications menu (or search for “Scorr”).

Step 5: Sign in with your company email! allow Location if needed for attendance.

- If apt reports dependency issues: `sudo apt --fix-broken install` then retry the .deb install.
- Updating: download the new Scorr.deb and run `sudo apt install ./Scorr.deb` again.

3.3 Install on Android

Step 1: Tap Download Android App on <https://scorr.walfia.ai/#download-app>.

Step 2: Open your phone's Downloads folder (or the notification) and tap scorr.apk.

Step 3: If Android asks “Install unknown apps?” or “Allow from this source?”, allow it for your browser or Files app.

Step 4: Tap Install! Open.

Step 5: Sign in with your company email and password.

Step 6: When prompted, allow Location (Always / while using the app + background) so GPS attendance can auto check you in and out.

- If install is blocked: Settings! Apps! Special access! Install unknown apps!
- If an older Scorr is installed, update by installing the new APK over it (same app ID).

3.4 Install on iPhone / iPad (Safari)

Use Safari only — Chrome or other browsers cannot Add to Home Screen the same way.

Step 1: Open <https://scorr.walfia.ai/?app=1> in Safari.

Step 2: Tap the Share button (square with an arrow pointing up).

Step 3: Scroll the share sheet and tap Add to Home Screen.

Step 4: Confirm the name Scorr! tap Add.

Step 5: Open the new Scorr icon on your Home Screen! Sign In.

Step 6: Allow Location when you use GPS attendance.

3.5 Website (browser only)

- You can use Scorr fully in the browser at <https://scorr.walfia.ai> without installing.
- Sign In with the same email and password as the desktop and mobile apps.

3.6 After install — first open

- You see Sign In / Register Company only (no marketing homepage chrome).
- Sign in! accept the monitoring / location policy if shown.
- Enroll authenticator MFA and save backup codes (Section 5).
- Your role (Admin, HR, Manager, or Employee) opens the matching dashboard.

4. How to register an organization

Company registration creates your private Scorr tenant. The first person who registers becomes the company Administrator. A 3-day free trial starts when Walfia approves the company — not when you submit the form. No credit card is required.

4.1 Register Company

Step 1: Open <https://scorr.walfia.ai> and choose Register Company — Free for 3 D (Register Company tab).

Step 2: Account step: Company name, your full name, admin email, phone, password (minimum 6 characters), confirm password !' Continue.

Step 3: Company step: Optional industry and headcount band !' Create account.

Step 4: Enter the 6-digit email verification code !' Verify and continue. Use Rese

Step 5: You will see Awaiting admin approval. You cannot open the dashboard until approved.

4.2 What happens next

- Walfia (info@walfia.ai) is notified.
- Platform owner opens /platform !' Pending !' Approve (or Reject).
- On Approve, a 3-day Professional-level trial starts.
- You become the first Administrator and company owner.

4.3 After approval — first login

Step 1: Sign in with the same email and password.

Step 2: Accept the policy checkbox if prompted.

Step 3: Enroll MFA and download your backup codes.

Step 4: You land in the Admin console — add departments, people, offices, shifts, and tasks.

If status is Rejected, registration was not approved. If Trial ended or Account paused, contact info@walfia.ai.

5. How to sign in & set up security (MFA)

5.1 Sign In

- Website or app !' Sign In.
- Enter Email Address and Password. Accept the policy checkbox when shown.
- Forgot password? Enter your registered email !' Send password. Scorr email (rate-limited; wait about 15 minutes if blocked).

5.2 Authenticator MFA (required)

After password, Scorr opens Authenticator required. Use Google Authenticator or Microsoft Authenticator.

Step 1: Scan the QR code (or type the Manual key).

Step 2: Enter your account password and the 6-digit authenticator code !' Verify a

Step 3: Save 10 one-time backup codes (XXXX-XXXX). Download or copy them and store offline.

Step 4: Later logins: password + authenticator code, or one unused backup code.

5.3 Lost phone / authenticator

- On the MFA screen: Send verification code to your login email !' Verify !' re-
- Or ask your Admin !' People !' Reset authenticator.
- Settings !' Account security: regenerate backup codes, set a recovery email.

Demo sandbox accounts skip MFA. Real Admin, HR, Manager, and Employee accounts must enroll.

6. Roles at a glance

Each person has one role. The role chooses the dashboard. Header badges show: Admin · HR · Manager · Employee.

Role	Main purpose
Admin	Full company setup: people, departments, assign tasks, rewards, attendance, Office GPS, live tracking, analytics, export, branding. Reviews manager/HR leave and daily reports.
HR	HR console: My day attendance, organization attendance/shifts, daily report to admin, review staff reports, rewards, people ops. Must report to a company admin.
Manager	Team KPIs, assign tasks, leave approvals, My day attendance, team attendance, rewards approvals, own daily report.
Employee	Own KPIs, GPS/remote attendance, leave requests, daily report, redeem gifts.

Rules when adding people

- Employees and managers need a department.
- HR must report to a company admin (Reports to is required).
- Work location: Office (GPS) · Remote (supervisor marks) · Hybrid.
- People only see their own company — never other tenants.

7. Admin dashboard — how to use it

Eye brow: Admin console. After sign-in you see the sidebar menu. Use it to run the whole organization.

7.1 Sidebar menus

People

Add teammates. Set role, department, job title, Reports to, work location. Email login details, reset password or authenticator, open a person's hub (KPIs, attendance, rewards, reports).

Assign Task

Create KPI templates and assign tasks with weightage and dates. Review completions: Approve & award or Send back.

Daily Reports

See every manager and employee daily report by date and department. Filter All roles / Managers / Employees / HR. Stats show submitted vs missing.

Rewards

KPI awards, History, People, Redemptions, Catalog. Approve, Delivered, or Reject gift requests.

KPI & Rewards

Company weightage board: Earned, Current, Used, Banked per person.

Analytics

Individual performance trends and attainment.

Attendance

Leave approvals, Remote/hybrid marking, Shifts, History (by department). HR appears under Human Resources.

Office GPS

Create geofence zones, assign to people/teams, manage offices.

Live Tracking

Today's field board: At site / Away / Offline.

Departments

Org structure (Sales, Marketing, ...).

Export

Monthly or quarterly Excel / PDF / CSV.

Settings

Branding (name, logo, colors) + Account security + Delete my account.

7.2 First-week checklist

Step 1: Settings — company name, logo, colors.

Step 2: Departments — create departments.

Step 3: People — add Managers, Employees, and HR. Set Reports to and Work location.

Step 4: Office GPS — create zones and assign staff who use GPS.

Step 5: Attendance !' Shifts — create shifts and assign people.

Step 6: Assign Task — create templates, assign first KPIs.

Step 7: Ask everyone to install the app, enroll MFA, and allow Location.

7.3 What only Admin does

- Approve manager and HR leave requests.
- Receive notifications when HR or managers submit daily reports.

- Approve new company branding and full org settings.

8. HR dashboard — how to use it

Eyebrow: HR console / HR workspace. HR has company-wide tools and also reports personally to a company admin — like a staff member with attendance and a daily report.

8.1 Sidebar (same family as Admin)

- People, Assign Task, Daily Reports, Rewards, KPI & Rewards, Analytics, Attendance, Office GPS, Live Tracking, Departments, Export, Settings.
- Focus areas for HR day-to-day: Attendance, Daily Reports, People, Rewards, Shifts.

8.2 Attendance (HR)

My day

Your own shift card, auto GPS attendance when you enter/leave the office (manual Clock in/out still available), leave request to admin, and your leave history.

Leave

Review pending leave from employees (admin still approves manager/HR leave).

Remote

Mark remote/hybrid staff Present or Absent.

History

Browse by department. HR staff appear under Human Resources (not "Unassigned").

Shifts

Create/edit/assign company shifts; assigned people get emails.

8.3 Daily Reports (HR)

My report

Write and submit your daily work log. Only company admins are notified and can read it.

Organization

Review manager and employee daily reports by date and department — professional tabbed workspace.

8.4 HR reporting line

- When Admin creates HR: Role = HR (reports to admin), Reports to (admin) is required.
- HR leave and HR daily reports go to Admin for review.
- Set Work location so HR can use Office GPS, Remote, or Hybrid attendance.

HR keeps existing company tools (history, shifts, rewards) and gains My day attendance + My report like employees/managers.

9. Manager dashboard — how to use it

Eyebrow: Manager console. Managers lead a department team and also complete their own KPIs and attendance.

9.1 Menus

My KPIs

Your own assigned tasks and weightage scoreboard.

Assign Task

Create/assign KPIs to people in your department. Review team completions.

People

Team ranking; open a person for scoreboard details.

Attendance

Approvals (leave) · My day (auto + manual check-in) · Team · Shifts · History.

Rewards

Approve / Delivered / Reject team gift requests. Redeem your own gifts.

Daily report

Submit your daily work log for admin review.

Settings

Password, Account security, Delete my account.

9.2 Typical daily flow

Step 1: Open Attendance !' My day. With Office GPS, Scorr auto checks you in when shift hours (you can also tap Clock in).

Step 2: Work your My KPIs; Mark Complete when done.

Step 3: Assign Task — give new work to the team with weightage and due dates.

Step 4: Approvals — approve or reject employee leave.

Step 5: Rewards — arrange pending gift requests.

Step 6: Daily report — write what you accomplished today.

Step 7: Clock out when you leave (mid-shift checkout is allowed if needed).

Managers cannot

- Create company users, departments, or branding.
- See other companies or unrelated departments.

10. Employee dashboard — how to use it

Eyebrow: Employee. You only see your own work, attendance, and rewards.

10.1 Menus

My KPIs

Open and History. Scoreboard shows Left to use, Earned, Used, Banked. Open a task to start it, then Mark Complete.

Attendance

One-time Automatic attendance enrollment (no daily login): phone GPS or office Wi-Fi, or laptop on/off on the office network. Only active from 1 hour before your shift until 1 hour after. Manual Clock in/out, leave, and history still available.

Rewards

Redeem company gifts / catalog with weightage. Track Pending · Approved · Delivered · Rejected.

Daily report

What did you accomplish today? (20–8000 characters). Submit or Update.

Settings

Change password, backup codes, recovery email, Delete my account.

10.2 Typical daily flow

Step 1: Sign in once on web or phone app !' allow Location (Always / background GPS).

Step 2: Attendance !' Mark attendance / My day. During your shift, entering the o also tap Clock in inside the zone.

Step 3: My KPIs !' open tasks, complete work, Mark Complete.

Step 4: Daily report !' write today's summary !' Submit.

Step 5: Clock out when leaving. Request leave from Attendance when needed.

Step 6: Rewards !' redeem when you have enough Current or Banked weightage.

Opening a KPI starts it. Only receiving the assignment email does not start the task.

11. How to mark attendance

Attendance uses your Work location (Office / Remote / Hybrid), your assigned shift, and (for Office) an Office GPS zone. Times use Asia/Karachi.

11.1 Who marks attendance

Role	Where
Employee	Attendance !' Mark attendance
Manager	Attendance !' My day
HR	Attendance !' My day
Admin	Does not self-clock like staff; reviews Leave, Remote, Shifts, History

11.2 Office (GPS) — auto + manual clock in / out

Step 1: Admin assigns you an Office GPS zone and a shift.

Step 2: On your phone, allow Location for Scorr (prefer Always / background so attendance works without opening the dashboard).

Step 3: Sign in once. After that you do not need to open the dashboard for auto attendance.

Step 4: Enter the office during shift hours (check-in window opens 1 hour before

Step 5: Leave the office !' Scorr auto checks you out (GPS uses a small buffer so

Step 6: Manual Clock in / Clock out buttons remain available anytime you need them (including mid-shift leave).

- Multi-visit days are supported — each enter/leave pair is saved; time away is not counted.
- If you are still checked in when the shift ends and you have left the site, Scorr can auto close the visit.
- On the phone app, GPS continues in the background after you leave the dashboard. On the web, keep the browser tab available if you rely on web GPS.
- Logging out returns you to the normal Scorr landing page — the GPS status banner is not shown; attendance GPS still runs silently when enabled.

11.3 Remote

- You do not use GPS. Your supervisor (manager or admin) marks Present or Absent.
- That record is saved in your attendance history.

11.4 Hybrid

- Office days: auto GPS check-in/out (manual buttons still available).
- Work-from-home days: mark Present / Absent on My day, or your supervisor marks you.

11.5 Leave

- Request leave: Annual / Sick / Other · From / To · reason !' Submit.
- Employee leave !' manager (or admin) approves.
- Manager and HR leave !' Admin approves.

11.6 History & downloads

- Browse This month / Month by month / Full year.
- Admin/HR History: pick department (or Human Resources for HR staff) !' per

12. How to assign tasks (Admin & Manager)

Assign Task is how work becomes measurable KPIs with weightage. Admins can assign across the company; managers assign within their department.

12.1 Concepts

Term	Meaning
Weight / Weightage	Task importance 1–100%. Sum of open tasks per person cannot exceed 100%.
Template (KPI's)	Reusable task definition (category, description, late rules).
Assign Task	Give a template (or task) to a person with start/due dates and weight.
Achieved	On approve: 0 up to the task weight (what they earned).
Periods	Overall · Month · Year views on scoreboards.

12.2 Admin — assign a task

Step 1: Open Assign Task in the Admin console.

Step 2: Optional: KPI's tab — create a template (category, weight guidance, description, grace/late rules).

Step 3: Assign Task — choose department !' person !' task/template.

Step 4: Set Weight (%), Start date, Due date, optional note. Check the Weight in

Step 5: Tap Assign KPI. The person gets in-app + email notification.

Step 6: When they Mark Complete, open Review — set Weightage to award !' Appr

12.3 Manager — assign a task

Step 1: Open Assign Task in the Manager console.

Step 2: Choose someone in your department.

Step 3: Set weight and dates !' Assign.

Step 4: You (and the reporting manager if applicable) get completion alerts to review.

12.4 Filters on Assigned Task

- Current | Review | Completed.
- Cards show Weight, Start, Due, Progress, Health, Achieved.
- Actions: Pause / Resume · Edit · Remove (incomplete only where allowed).

You cannot assign if the person already has 100% open weightage. Finish or remove open tasks first, or lower the new weight.

13. KPI completion & review

13.1 Employee / assignee

Step 1: My KPIs !' Open a task (status becomes In progress).

Step 2: Do the work before the due date.

Step 3: Mark Complete !' status pending_review.

Step 4: Wait for Approve & award. Weightage may reveal on the dashboard on the last day of the month.

13.2 Admin / Manager review

Step 1: Open Assign Task !' Review filter (or notification deep link).

Step 2: Enter Weightage to award (0 to max task weight).

Step 3: Approve & award — or Send back with a note.

Performance bands (typical)

- Outstanding "e 95% · Excellent 90–94 · Good 80–89 · Needs Improvement 70

Awarded weightage feeds Current / Used / Banked for gifts. Unused closed-month leftovers can move to Banked (never expires).

14. Rewards & gifts

Rewards use monthly weightage (0–100%), not a separate points wallet.

Label	Meaning
Earned	From finished/approved tasks this month.
Current / Left to use	Spendable now.
Used	Spent on gifts this month.
Banked / Saved for later	Leftover from closed months — never expires.

14.1 Redeem

- Employee or Manager ! Rewards ! choose company gift or catalog item ! Redeem
- Confirm cost in % weightage on screen.

14.2 Approve

- Manager or Admin ! Rewards ! Redemptions / Gifts to arrange.
- Approve · Delivered · Reject (reject returns weightage).
- Examples: movie tickets (streak), dinner voucher (outstanding month), surprise gift (elite streak), catalog items at listed %.

15. Daily work reports

15.1 Who submits

- Employees, Managers, and HR submit their own daily report.
- Company admins receive notifications and review submissions.
- Length: minimum 20 characters, maximum 8000.

15.2 How to submit (Employee / Manager / HR)

Step 1: Open Daily report (or Daily Reports !' My report for HR).

Step 2: Pick the date (today or up to 7 days back).

Step 3: Write a clear summary of projects and outcomes.

Step 4: Submit today's report (or Update if already saved).

15.3 How Admin reviews

Step 1: Open Daily Reports.

Step 2: Select a date on the calendar.

Step 3: Filter department and role (All / Managers / Employees / HR).

Step 4: Open cards to read content; see Submitted vs Not submitted counts.

15.4 How HR uses Daily Reports

- My report — send your log to admin.
- Organization — review manager and employee reports company-wide.

16. Office GPS & live tracking

16.1 Office GPS (Admin / HR)

Step 1: Office GPS !' Create zone: name, address, pin (or use current location), r

Step 2: Assign people — individual, or assign to all employees/managers/HR.

Step 3: Manage offices — edit or deactivate zones.

16.2 Live Tracking

- Today's board for GPS staff: At site / Away / Offline / No site.
- Refreshes about every 2 minutes for the live board.
- Attendance auto check-in/out uses periodic GPS on the phone app (about every 5 minutes in the background) and while the session is active — for attendance, not continuous surveillance.
- Managers see their team scope; Admin/HR see the organization.

Location is stored as company attendance data — not sold, never shown to other companies.

17. Analytics, exports & notifications

17.1 Analytics

- Admin/HR: Individual Performance & Activity Analytics — trends and attainment.

17.2 Export

- Export! Monthly or Quarterly! Excel, PDF, or CSV.

17.3 Notifications

- Bell icon: unread alerts. Tap to deep-link into tasks, leave, gifts, or daily reports.
- Email subjects include KPI assigned/completed, shift changes, login details, and password/MFA recovery.

18. Security & account deletion

18.1 Safety basics

- Passwords hashed by Supabase Auth; failed logins rate-limited.
- Idle sessions sign out. Company signup needs email OTP.
- Privileged roles use TOTP MFA + backup codes.
- Every record is company-scoped.

18.2 Device permissions

Permission	Why
Internet	Sign-in, KPIs, attendance, mail.
Location (while using)	Clock in/out at the geofence.
Notifications	Optional reminders.

18.3 Delete my account

Help page: <https://scorr.walfia.ai/delete-account>

Step 1: Settings ! Account security ! Delete my account.

Step 2: Type DELETE and enter your password ! Confirm.

Company owners with other members must transfer ownership or delete the whole company first. Email info@walfia.ai for help (within 30 days).

19. Plans, trial & demo

Plan	What you get
Starter	3-Day Trial at \$0, then about \$12/user/mo · up to 25 employees.
Professional	About \$18/user/mo · unlimited seats · GPS/shifts/analytics · Most Popular.
Enterprise	Custom — Contact Sales.

19.1 Demo sandbox (?demo=1)

Role	Login
Admin	admin@walfia.ai / admin123
Manager	manager@walfia.ai / manager123
Employee	employee@walfia.ai / employee123

- Demo skips MFA and does not affect real companies. Demo admin cannot create production users.

20. Troubleshooting & support

Problem	What to try
Cannot download Windows/Linux	Use https://scorr.walfia.ai/#download-app ! Download for Windows or Linux and open from the official GitHub Release.
Windows Setup blocked	SmartScreen! More info! Run anyway only if you downloaded from the official source. Then finish the Setup wizard.
Windows only runs from a folder	If you used an old zip. Download Scorr-Setup.exe and install — then open from Start Menu.
Linux .deb won't install	cd ~/Downloads then: <code>sudo apt install ./Scorr.deb</code> (fix broken deps if apt asks).
Cannot download APK	Use https://scorr.walfia.ai/#download-app ! Download Android App from the web browser.
APK won't install	Allow install from browser/Files; uninstall old build only if signature conflicts, then reinstall.
iPhone install fails	Use Safari! Share! Add to Home Screen (not Chrome).
Awaiting approval	Wait for Walfia to approve at /platform; email info@walfia.ai if delayed.
Stuck on MFA	Backup code, email recovery, or Admin! People! Reset authentication.
Wrong dashboard	Ask Admin to check your role on People.
Cannot assign KPI	Department + person required; open weightage "d 100%.
GPS check-in fails	Precise/Always location on; assigned office; inside radius; within shift window; reinstall latest app (1.3.5+) for background auto attendance.
HR under wrong group	History shows Human Resources for HR; not Unassigned.
Daily report not visible	Admin: Daily Reports! pick date. HR: Organization tab.
